

Social Media Post & Caption Generator

This project generates random social media captions based on user-selected categories. The dataset contains captions from influencers belonging to Beauty, Fitness, Food, and Technology categories.

```
import pandas as pd
```

```
df = pd.read_json("instagram-posts.json")
```

```
df.shape
```

```
(4, 2)
```

```
print(df["category"])
```

```
0      Beauty
1      Fitness
2        Food
3    Technology
Name: category, dtype: object
```

```
print(df.iloc[0]["influencer"][0]["influencer"])
```

```
Zoe Sugg
```

```
print(df.iloc[0]["influencer"][0]["posts"][0])
```

```
Thinking about my highlights of this year, and New York was definitely one of them. Another was releasing @filmmapp w

print(random.choice(captions))
```

```
When you aren't supposed to be in the photo, but very much are. 🤪👉 @joe_sugg was too good not to crop out. Spot him
Also, none of us know why Dianne is holding her foot with her foot, but it looks cute... kinda 🤪
```

```
all_captions = []

for inf in df.iloc[0]["influencer"]:
    all_captions.extend(inf["posts"])

print(len(all_captions))
```

```
44
```

```
import random

print(random.choice(all_captions))
```

```
Zach & Zoë's Brooklyn Adventure ~ .
When both your partners have to work so you get to run around the city exploring! We stumbled into @roughtradenyc and
```

```
all_captions = []
```

```
